

Resolution from Godstone

Area Meeting 27/4/2009

This branch understands the nature of safety critical training and is in agreement that training is of utmost importance. However this branch is NOT happy with management's demands for us to undertake training on rota days, especially single or two days training periods which could be accommodated on Duty days. We are sympathetic to the management and would agree that longer training periods may have to include rota days from time to time i.e. a weeks course may be your last rota day then be covered by your first two day shifts then two days following giving you the nights off then back to your normal shift pattern.

Therefore this branch demands the Surrey EC to challenge compulsory rota day training on internal training courses up to 4 days in length.

Proposed Godstone
Seconded Leatherhead
Voting Unanimous
Surrey EC also unanimous in support
